Lauren,

I'm hoping to be at the Berkeley Workshop and Seminar next month, but my travel is still a bit up in the air. I'm pretty sure Chris Lau will be able to go, but my bosses are still mulling it over. I'm really interested in meeting the folks who will be attending.

I've attached the Taves documents and could send more depending on what you want.

Unfortunately I don't think there is a good way to search the information in the docket. I just spent a few days reading random files in time periods that seemed like they would be fruitful. Rob Bilott probably read them all – in fact I'll send a few of his summaries that may contain references to specific AR226 numbers.

Do you have the docket? You used to be able to get access to it on-line but now I think you have to order it by contacting our folks in DC.

Please feel free to call anytime. I am eager to hear more about your work.

Thank you very much,

Andy

Hi Andy,

I hope you are well. I wanted to let you know that I'll be attending the FR conference in California on Feb 12th, if you have time on Thursday the 11th or Friday the 12th, it'd be great to catch-up and chat.

I also wanted to ask you if you might be able to email me some of the documents you attempted to (perhaps in December before the holidays?) that were too large to send in one email? I believe one was a document related to Dr. Taves' research.

Finally, could I give you a call this week to get some advice on how to search an EPA docket effectively?

Thanks!

Lauren
